Why VELUX- The No Leak Skylight™?

Designed
and tested
for the
Canadian
Climate

Enjoy comfort, a view, fresh air and the No Leak Promise.
Installation is the most important process in the No Leak, No Worries promise.

The Deck Mount Skylight

Our Deck Mount skylight has superior waterproof technology, a low profile for enhanced aesthetics and is energy efficient. It is the only skylight to provide a direct seal to the roof deck.

Features 3 Layers of Water Protection

- 1 Pre-attached deck seal provides seal between the frame and roof deck for a leak-proof installation.
- 2 Adhesive underlayment for secondary water protection against the harshest Canadian weather.
- 3 Engineered flashing for easy installation and primary water protection.

The Curb Mount Skylight

The VELUX Curb Mount skylight is unlike any other curb mount on the market and is the best choice for replacement skylights and low slope roofs.

Features 3 Layers of Water Protection

- 1 Adhesive underlayment for secondary water protection and to water proof the curb.
- 2 Engineered flashing for easy installation and primary water protection.
- 3 Curb gasket on the inner frame of the skylights that provides an airtight seal to the curb.
